

ABSTRACT

An ultraviolet excited light-emitting device is disclosed. The ultraviolet excited light-emitting 5 device comprises a phosphor having at least one selected from the group consisting of Eu and Mn as an activator and a compound represented by a formula (1):

wherein M^1 is at least two selected from the group 10 consisting of Ca, Sr and Ba, or Sr or Ba, M^2 is at least one selected from the group consisting of Mg and Zn, and M^3 is at least one selected from the group consisting of Si and Ge in the formula (1).
